

Feature Comparison Sheet

How TOTTECH Clinical Services should be positioned

Generated: 2026-06-10T03:40:31.504Z

Against Basic HMS Products

Most products pitch OP, IP, lab, pharmacy, and billing. TOTTECH leads with SaaS tenant isolation, IVF workflows, patient timeline, branding, and integrated revenue flow.

Against Enterprise HMS Products

Large platforms are powerful but expensive and slow to deploy. TOTTECH is positioned as faster, simpler, affordable, and adaptable for Indian hospitals and IVF centers.

Must-Have Proof Points

End-to-end patient workflow, no cross-tenant data leakage, PDFs with branding and QR verification, billing reconciliation, role access, audit trail, and real demo data.

Buyer Personas

Chairman: growth and control. CEO: operational throughput. CFO: collections and receivables. CIO: security, audit, scalability. Doctor: simple patient record and reports. Front desk: fast registration and billing.
